Alexandria, VA 22313

RESPONSE TO OFFICE ACTION

Dear Sir:

This paper is submitted responsive to the Office Action mailed November 17, 2006. That Office Action entered an election of species requirement against claims 1-40 of the application, and set a deadline for response of December 17, 2006.

The action indicated that claims 1 and 25 are generic, and required election of position of the decomposition catalyst, support, means of depositing the catalyst, positions of the oxygen reduction catalyst and species of the oxygen reduction catalyst.

Applicants elect 1(A) (iii), 1(B) (iii), 1(C) (iv), 2(ii) and 3(i), as identified in the Office Action.

This election is made with partial traverse as follows. For section 1(A), it would be reasonable to examine both (iii) and (iv) together, specifically, the position of the catalyst as a layer between the membrane and an electrode, be it anode or cathode, should be searchable and proper for consideration together. This would lead to more efficient and compact prosecution without being unduly burdensome on the Examiner. Claims 1-6, 8-12, 14, 15, 25-29, 33, 37 and 38 all contain subject matter related to the elected species. Further, if the Examiner is persuaded by the limited traverse, consideration of claim 13 is also appropriate and requested.
